

PURE PHOTOPOLYMER SBQ - PLATINUM™

Ulano®

PLATINUM™

PURE PHOTOPOLYMER (SBQ) TEXTILE EMULSION

Presensitized and Premixed

Ulano Platinum is a ready-to-use SBQ photopolymer direct emulsion formulated for imprinted sportswear printing and other markets. With Platinum, it is possible to use less costly white mesh without the closing up of fine lines and details. With Ulano's anti-halation chemistry, **Platinum** is ultra-fast exposing! It is perfect for shops with high stencil making through-put, as well as shops with fluorescent tubes or other low-intensity light sources.

FEATURES AT A GLANCE

- **Ultra fast exposing**
 - Suitable for the CTS exposure systems
 - Good wet strength, exposure latitude and durability
- **High (40-41%) solids content**
 - Fast drying
 - Better mesh bridging, good print edge definition
- **Easy wash-out**
 - Fast stencil through-put for high volume shops
 - Suitable for the automatic washout units
- **High humidity resistance**
 - High durability, even during the summer seasons
- **Excellent solvent resistance**
 - Resists plastisols (including aggressive post-phthalates) and most wash-up solvents
- **Easy reclaim**
 - Can be used in automatic reclaiming systems
 - Resists water-based and discharge inks, if used with optional diazo
